

# Barnaby Bear Investigates - Hedgerows

A **hedge** or **hedgerow** is a row of shrubs and sometimes trees. They were usually planted and "trained" to form a barrier. They marked the boundary of an area.

Farmers use them to prevent cattle straying out of fields.

Hello, look at all the flowers!

Can you see any pink flowers?

On them!

How do I recognise a **Pink campion**?

Look carefully at the petals .....  
They look as if someone has cut a  
bit out of each one with scissors.  
Both the flower and the stem look  
pink!

Cut bits!

This is a  
**buttercup** the  
colour of butter!

## How do I recognise a **buttercup**?

The bright yellow is very easy to see but there are a number of plants that are yellow. To check that it is a Buttercup look at the petal and the leaf.

### **The Petal**

There should be 5 petals on the flower which is shaped like a bowl.

### **The Leaf**

The leaf is bigger than the petal and has jagged edges. It also has light patches on it.

Look for **buttercups**  
and **pink campion**!

## How do I recognise **goosegrass**?

**Goosegrass** grows in stringy lines covered in hairs shaped like hooks. Like the velcro on your shoes, they can hook onto things that pass by!

Small round seeds can be found on these strings. **Goosegrass** leaves are long and thin.

One more fact: -  
It may be called **goosegrass** but it is not really a grass!
