

Hi Everyone,

I have another Power Point for you to work on – multiplication and division of fractions.

There is a lot in it so just do a little every day. You also need to enjoy spending this bonus time with your families, plus I am sure you have lots of other school work to do.

You can message me on Google Classroom, if you are stuck, and I'll try to help if I can.

In this Power Point I have put the teaching slides in Red. You need to focus particularly on those slides as that is where you will find how to do the sums.

I know fractions are not very exciting but I am thinking of next year and trying to give you some work that will help you moving forward.

Next week I'll include some brain teasers – don't forget our countdown sums – they are great for mental Maths.

Challenge –

100 5 6 8 2 1 3 and the target is 421 - Good Luck

M. O'Shea
