

Hi Everyone,

I am sure you are enjoying your extended holiday.

I know it is not easy – particularly with the fine weather, but you really should try to do something in Maths every week.

I have made out some Power Points that will hopefully help you remember some of the work we have done.

There are slides with a little explanation followed by a few sums to try. The answers are then on the following slide.

This week there are 3 Power Points

Power Point 1 – Fractions – equivalent / improper etc..

Power Point 2 – Addition of fractions

Power Point 3 – Subtraction of fractions

It is important that you do these in order.

Next week I will have 3 more Power Points for you.

In another couple of weeks Google Classroom will be set up so you will be able to ask me for help, through this, if you need it.

Don't forget Mangahigh is also another great way of keeping up with Maths.

Do your best with the work I have set and don't forget I will be able to help you through Google Classroom very soon.

Take Care

Ms O'Shea
